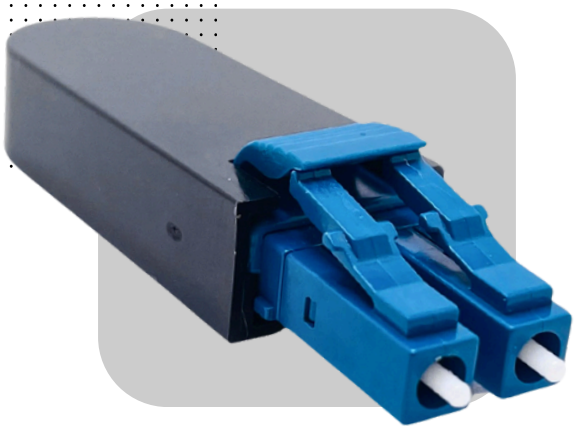
OPTICAL FIBER LOOPBACK MODULES



LC/UPC DUPLEX PVC (OFNR) 9/125 SINGLE MODE FIBER LOOPBACK MODULE

The Fiber Loopback Module is an essential tool for fiber optic testing and network restoration, offering a simple and cost-effective solution. It provides a reliable return path for a fiber optic signal, allowing you to diagnose and isolate network issues efficiently. By sending a loopback test to network equipment, you can quickly pinpoint problems, making it an indispensable asset in any testing scenario.

Key Features:

- Fiber Type: 9/125 Single Mode
- Connector: LC/UPC
- Insertion Loss: ≤0.3dB
- Return Loss: ≥50dB

LC/UPC DUPLEX PVC (OFNR) OM3 AQUA FIBER LOOPBACK MODULE

Our LC Loopback Module is engineered to offer a reliable return path for fiber optic signals, making it an essential tool for burn-in testing and network troubleshooting. The high-density push-pull tab design ensures seamless integration into a wide range of applications.

Key Features:

- **Low Insertion Loss:** Ensures minimal signal degradation.
- **Hard Case Design:** Provides enhanced durability for rigorous use.
- **Versatile Testing:** Ideal for testing LC connections (10G, 40G, 100G).
- **LC/UPC Connector:** Delivers high-performance connectivity.
- **Troubleshooting Aid:** Designed to effectively diagnose and resolve network connection issues.
